

## DEVELOPMENT OF THE WIND POWER GENERATION CAPACITY

Today Alerion Energie Rinnovabili, has acquired control of a company owning the rights for the construction and operation of a wind farm located in Sicily

The wind farm, which is fully permitted, will have an installed power capacity of 36 MW and when fully operational will produce roughly 80 GWh/year. Considering that the construction will start in the beginning of 2007, it is foreseen that the plant will be operational during the first semester 2008.

The total amount of the investment is roughly equal to 60 million Euro, including the purchase of the wind turbines comprehensive of operation and maintenance full service for two years. The investment will be covered with recourse to own resources and project financing.
