
Alerion signs an agreement for the acquisition of 50% of a company owning construction and management rights of a wind farm with an authorised capacity of 72.5 MW in Molise

~ ~ ~ ~ ~

Alerion Energie Rinnovabili S.r.l., company fully owned by Alerion Industries S.p.A., has signed an agreement for the acquisition of 50% of the share capital of New Green Molise S.r.l., company owning construction and management rights of a wind farm in San Martino in Pensilis (Campobasso). The wind farm, which has already obtained all the necessary authorizations, has an authorised power capacity of 72.5 MW, with a production at full capacity of approximately 140 GWh/year. The overall value of the investment for the entire farm, including the purchase of turbines, electrical and civil works and accessory costs, will be of approximately €130 million.

The investment will be financed by equity and project financing, for which Alerion envisages to assign an arranging mandate to Banca Infrastrutture Innovazione e Sviluppo S.p.A. (Gruppo Intesa Sanpaolo) and Interbanca S.p.A..

Giulio Antonello, Chief Executive Officer of Alerion Industries S.p.A., commented "With this acquisition, Alerion increases fully authorised and in construction wind power capacity to a consolidated figure of approximately 160 MW, which add to the 46 MW presently operating. This transaction confirms Alerion's ability to persistently achieve its objectives"
