**PRESS RELEASE**

Milan, 2 August 2010

**Alerion gets first full permit for Romanian wind farm.**

**Total investment will be around € 85 million for a yearly production of 155 GWh.**

Alerion Clean Power S.p.A., a renewable Energy company listed in Milan, has received, through its subsidiary Compañia Eoliana SA full authorization to build a wind farm with a total installed capacity of 64,8 MW.

The 36 turbines farm will be built in the Auseu and Borod municipalities in the north east Bihor County and will have a yearly production of approximately 155 GWh, after a total investment of € 85 million.

The investment shall be cover by Alerion's financial resources and project financing.

"The authorization of our first international farm – comments Giulio Antonello CEO of Alerion Clean Power - represents an important milestone in our growth strategy and confirms that Alerion's ability to deliver can be brought beyond Italian borders"

"Internationalization and geographical diversification – he continues – will become a central element in Alerion's growth strategy and shall soon turn Alerion into a relevant European player in the renewable energy industry".
