

Press release

Alerion grows in the photovoltaic sector in Romania through the acquisition of three plants under construction with a capacity of 14.3 MW

Milan, 8 June 2021 - Alerion Clean Power S.p.A., through its Romanian subsidiary Alerion Clean Power RO, has acquired a 100% holding in three companies that are the owners of three photovoltaic plants currently under construction in Romania, with a total installed capacity of approximately 14.3 MW. Construction of the three acquired plants is expected to be completed by October 2021.

This transaction is part of the collaboration agreement with the company PV Project RO for the development of photovoltaic plants in Romania (see the press release of 10 February 2021), which envisages the construction of photovoltaic plants with a total installed capacity of approximately 200 MW in Romania by 2023.
