Alerion Clean Power:

Signed an agreement for the development of three new wind projects in Romania with a capacity of 350 MW

Milan, May 5, 2021 - Alerion Clean Power S.p.A. has signed with Monsson Alma, a leading company in the development of wind projects in Romania, and the shareholders of the relevant project companies a development agreement for 3 new wind projects in Romania, with a capacity of approximately 350 MW.

The authorization process for the plants under development is expected to be completed by the end of 2022.

The agreement will allow Alerion to accelerate the growth in a market with very large growth perspectives, thanks also to the renewable development plans promoted by the Romanian government.
