

## Press release

### **Alerion Clean Power: two new wind farms go into operation in Puglia with a total installed capacity of 62 MW**

**Milan, 9 May 2022** – Alerion Clean Power S.p.A., through its subsidiaries, Enermac S.r.l. and Naonis Wind S.r.l., have commenced operation of a new wind farm at Orta Nova in the Province of Puglia with an installed capacity of 51 MW, and will commence the construction of a second new plant with an installed capacity of 11 MW adjacent to the farm already in production, by the end of the current month of May.

The expected annual output of the wind farms is around 157 GWh, avoiding the emission of around 75,000 tonnes of CO<sup>2</sup> each year.

Josef Gostner, Chairman of Alerion Clean Power, commented: "The start-up of the wind farms in Orta Nova is another milestone in our investment and development programme. Our 2022-2025 business plan envisages an installed capacity of 3.8 GW by the end of the period, in the context of the national strategy of simplifying authorisation in the renewable energy sector in order to contribute to greater energy independence in the coming years".
