Alerion completes the acquisition of the “Milestone” wind farm in Ireland

The transaction strengthens Alerion’s presence in the Great Britain and Ireland area and marks a further step in the implementation of the 2025–2028 Industrial Plan.

Milan, 31st October 2025 – Alerion Clean Power S.p.A. (“Alerion”), through its subsidiary Alerion Ireland Limited, has completed the acquisition of 100% of Milestone Wind Farm Ltd, the company owning a 14.4 MW onshore wind farm located in County Tipperary, Ireland. The plant, which has been operational since 2018, consists of four Vestas V105 turbines with a rated capacity of 3.6 MW each and benefits from the REFIT support scheme, ensuring a minimum price for the electricity generated while also allowing participation in potential market upside. The expected annual production amounts to approximately 40 GWh (see press release 9 September 2025).

The completion of this transaction further strengthens Alerion’s presence in the Great Britain and Ireland area, where the Group is already active through Alerion UK Ltd with a consented 35 MW onshore wind project under pre-construction activities in Neath Port Talbot, Wales. The Welsh project will feature state-of-the-art turbines with an expected annual production of around 100 GWh.

The expansion of Alerion’s activities in the United Kingdom and Ireland represents an important milestone in the implementation of the 2025–2028 Industrial Plan, which aims to

achieve a significant increase in installed capacity and to further consolidate Alerion's position as a leading European operator in the renewable energy sector.
